

Architecture & Construction Committee

The following are areas where the Architecture & Construction Committee will consult with and advise the Board of Directors, within their responsibilities. This is part of our goal of providing a set of checks and balances and as such the committee will have no power of decision, only consultation.

1. Provide a consulting service to the Board for design, improvement or construction regarding Marble Arch Townhomes.
2. Researching on work orders to determine if there are any more efficient alternative solutions.
3. Research into methods of upgrading the common areas of Marble Arch Townhomes.
4. Providing reports on the above items as required.
